Ltd. conducts its manufacturing process at its Modish and Sophisticated Plant located at Delhi - "Plot No: G-32, Pocket-C, Sector 4, Bawana Industrial Area, New Delhi-110039" We are fully equipped with the latest machineries like SMT Pick n Place, Tool Room Facilities, Testing Lab facility, Skilled manpower and polished organizational credentials.

Vision

To pursue an excellence and growth based policy to be recognized as a reputed and reliable enterprise in the field of automotive lighting and signaling components manufacturing. Our vision also underlies the core philosophy of our organization and the way we have progressed. In order to achieve the above, the organization has made quality as the prime mover of its success.

Mission

To become the leading enterprise in the automobile industry by keep updating the new technology and giving 100% to our customer providing undistinguished quality and services in competitive rates.

History

- The LAPL Automotive India Private Limited Company, Delhi was formed on 11th June 2008 and Mr. Vikesh Jain took over management control.
- The company is engaged in the Manufacturing and supply of assemblies and automotive lighting for OE manufacturers in automotive sector.
- We commenced operations a spirited group of people to deliver quality products at the right price and in time.

Quality Policy

- Aarvi Shinx India Private Limited is committed to being sensitive to customer expectation and to providing quality products and services at a competitive price. In support of this commitment Aarvi Shinx India Private Limited
- Quality awareness and quality performance across all levels in the company through management leadership.
- The participation of all concerned and associates in making individual contributions to the quality improvement process.
- Continuous quality improvements by providing our associates with training, tools and information feed back to enable enhancement of quality of our products and services.
- Relationships with suppliers who consistently demonstrate their ability to fulfill quality, price and delivery objectives that are mutually beneficial.
- Quality into our product and services, striving for zero defects in everything we do, thereby reducing cost and increasing.

Future Plan

1. Management also intends to expand its production capacity by adding: -
 - Higher capacity in Injection Molding Machines.
 - Up-gradation of existing machines.
 - Replacement of older machines with new generation machines.
 - In-house testing facilities.
 - New Plant where in all units shall be consolidated under one roof for better utilization of resources and improve control over processes.
2. Management intends for any Technical collaboration to diversify the range of products in automobile safety devices by giving different USP to the product to create monopolistic market approach in India.
3. Company has 1000 sq. mtrs. Land in Haryana for expansion. Targeted customers are Mahindra, Piaggio, Honda, Maruti Suzuki, Yamaha, etc
